

# Quality Policy Statement

At Aurex Constructors, we deliver quality end-to-end solutions locally and internationally within construction, turnarounds, and maintenance projects across all energy sectors. Our goal is to exceed customer's expectations and to deliver projects on time, to the highest quality standard. This is underpinned by our unwritten ground rule: Around here, we produce quality not because we have to but because we want to.

## Our commitment

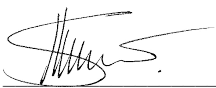

- ^ We are committed to delivering the highest quality service to our customers and stakeholders and we respect the communities we work in.
- ^ We comply with all agreed contractual, statutory and regulatory requirements, at all stages of our mandates.
- ^ We promote a culture of continual improvement by setting measurable objectives and continually monitoring the efficacy of our delivery against set objectives.

## Our responsibilities

- ^ While our Chief Executive Officer (CEO) is ultimately responsible for implementing and monitoring the Quality Policy, Aurex leadership and employees share in the commitments listed out above.
- ^ The management of quality is a line management responsibility and so the CEO holds Sector and Functional Leadership accountable for all aspects of quality within the business.
- ^ Quality Leadership manages teams of professionals in each sector and provides Sector Leadership (and their teams) with the competent advice required to ensure that all compliance and conformance obligations are met.
- ^ All employees and stakeholders working for and on behalf of Aurex are responsible for implementing and maintaining this policy and are empowered to speak up to ensure that they are met.

This policy shall be reviewed annually or as and when required to ensure that relevant changes are updated.

Our policy is available to all interested and affected parties on [www.aurex.com](http://www.aurex.com)

**Stuart Kent**  
Chief Executive Officer

## Our approach

At Aurex Constructors, these are our fundamental principles:

- ^ We are customer focused and strive to perform each activity 'Right First Time'.
- ^ We measure our continual improvement against specified quality KPI's.
- ^ Our quality management system is certified to the ISO 9001:2015 international standard and integrated with our systems for managing health, safety environment and welding execution.
- ^ Our risk-based approach is used to address both internal and external business requirements.
- ^ A Plan-Do-Check-Act method is followed to ensure all processes are adequately resourced and managed and that improvement opportunities are implemented.
- ^ Our people are equipped with accurate information, advice and training to ensure they understand their responsibilities and are competent and accountable for the work they perform.
- ^ Channels of communication are available and accessible to encourage all employees to contribute to the improvements of our quality performance.
- ^ We provide sufficient resources to fully implement this policy.
